LMT Tools: Exactly yours

LMT Tools is one of the most renowned specialists in the development and production of precision tools. With passion for precision it is ensured that the industrial customers implement unparalleled quality at the crucial interface between machine and workpiece, thereby offering excellent products which hold their own in the market.

With more than 1,200 employees worldwide, LMT Tools bundles the competence of leading specialists in precision tool technology and is comprised of the manufacturing companies LMT Belin, LMT Fette, LMT Kieninger and LMT Onsrud, as well as subsidiaries operating worldwide.

LMT Tools offers its customers an extensive product range of standard and special tools, permitting maximum quality and performance for general machining, the automotive sector, aviation and aerospace technology, energy technology, medical technology, and mold and die. All over the world, tool solutions for processing high-strength steel materials up to composites and plastic materials are being used. In this process, LMT Tools products focus on milling and threading, rolling systems, gear cutting and advanced tooling.

LMT Tools grants its customers access to global knowledge networks: in centers of competence in the core markets of China, India, the USA and EMEA, teams of experts representing Research & Development, Product Management, Application Engineering, and Customer Support ensure that customized solutions can be developed and supplied even faster.
